Guangxi Road Crack Dataset Access Application Form

1. Dataset Description

This dataset was collected in Guangxi, China, and contains 3,251 road crack images with corresponding pixel-level annotations and accompanying text prompts. To protect potentially sensitive information about the data collection environment, researchers are required to submit an access application. Data will be provided based on the intended research purpose stated in the application.

2. Applicant Information

Full name:	Institution:
Position / Status:	Department / Research group:
Institutional email:	Phone number (optional):

3. Data Requested and Intended Use

Research project / Paper title:

Requested data (select all that apply):

☐ Raw images ☐ Pixel-level annotations ☐ Text prompts

Proposed research and intended use of the data (brief description):

Expected period of use: ____ / ____ / _____ to ____ / ____ / _____

4. Data Use Agreement

1. The data will be used only for the non-commercial academic research described in this application. Any change in purpose requires prior authorization.

2. Without permission from the data provider, the applicant will not share the data with third parties or publicly release the images, annotations, or text prompts.

3. The applicant will store and handle the data securely and protect any potentially sensitive information about surrounding facilities or the collection environment.

4. The applicant will acknowledge the data source and follow the applicable citation requirements in any resulting publications or other academic outputs.

I confirm that the information provided above is accurate and agree to comply with the data use requirements.

Applicant signature: _____ Date (DD / MM / YYYY): ____ / ____ / _____
